RE: accreditation extension for Los Angeles City College

Dear David Sedghi,

This letter is to provide

This letter is to provide official confirmation of details discussed in a previous meeting. CAADE will be providing an extension to the existing accreditation for Los Angeles City College. The new expiration date will be February 1, 2026.

This extension is being granted due to changing regulations for addiction treatment counselor education and credentialing. At this time, an exact path to follow for these changes is not available as the Department of Health Care Services has to yet to provide official guidelines. We do not expect any of these changes to be problematic for your program and any program changes needed would be minor in nature. However, given that official documentation of compliance will need to be done by CAADE, we would rather review all materials as a complete package.

We will keep you and your staff updated on any changes when we receive them.

Thank you for being a CAADE school and everything you do for future addiction treatment counselors.

Sincerely,

Daniel J Prescott, MSW, MNLM, MA, ASW  
Acting Executive Director
